CHECKLIST

## Team Manager

Create an App 'Team Manager' which manages your team roster and RSVP for a 3 game series. : add and remove players. We should also be able to view each player's status of 'Playing', 'Not P the 3 games. More details are included in the below wireframe.

Our landing page should be the 'http://localhost:1337/players/list'

The landing page should present us with the current list of players, their positions and the ability to delete them.

'http://localhost:1337/status' route when the user clicks

- Present the player list
- Default status should
- Click on 'Playing' shou
- Click on 'Not Playing' :
- Click on 'Undecided' s

Delete should confirm the deletion with a pop-up warning: 'Are you sure you want to remove <player\_name>?'

Include validations to require a player name (min 2 characters long)  
Pref. Position should be optional.  
Keep the 'ADD' button disabled until validations pass.

Adding a player should redirect us back to the 'http://localhost:1337/players/list'
